Senior's Blue Cross (Group 66) Changes

For Albertans age 65 and older, coverage will remain the same. However, for those spouses who have yet to turn 65, the province has decided to discontinue coverage. This means that Albertans will lose this Blue Cross if they are not yet 65 years old.

To Phone or Not to Phone...

Nowadays, technology is everywhere. At Mayfair Pharmacy, patients can order refills on our website or by texting us.

Additionally, we believe when customers call us on the phone, a human being should be at the other end to answer (rather than a voice menu).

Therefore, when you call us, one of our staff will answer the phone and help you right away.

Reducing the Risk of Type-2 Diabetes

Type-1 diabetes is not preventable and its cause is unknown. This form makes up about 10% of people with diabetes.

Type-2 diabetes is much more common, affecting about 90% of people with this illness. Over the age of 40, increased body weight, high blood pressure, and high cholesterol are a few risk factors that can contribute to its onset.

The good news is most people can take steps to reduce their risk. Eating healthy, moving and keeping active, and maintaining a healthy weight will all help to prevent or slow the chances of getting type-2 diabetes.

Product Highlight

Hylo Eye Drops – These products are known for being preservative-free. Each bottle contains 300 drops and has a shelf life after opening of 6 months.

Transferring Prescriptions

Changing your prescriptions over to Mayfair Pharmacy is easy. Here's how:

- Bring in your new prescription
- Ask us to move your prescriptions from another pharmacy. We call to request a transfer and they fax it over to us – it's that simple.

Feel free to call us or drop by with any questions.

Conveniently located in Mayfair Place by the main floor elevators.

Our Services

- Quick Service – most prescriptions filled in 5 to 10 minutes
- Free Blister Packaging
- Free City-Wide Delivery
- Free Xpresspost Mail Delivery in Western Canada
- Injections & Vaccinations
- Refill Reminder Program
- Custom Pharmaceutical Compounding
- Diabetes Consultation
- Glucose Meter Training
- On-Site Blood Pressure Machine
- Patient Counselling
- Compression Stockings
- Home Health Care Products & Equipment
- Direct Billing to Drug Plans
- Medication Reviews & Care Plans
- Smoking Cessation

Custom Pharmaceutical Compounding

Compounding can be an effective alternative to administering medications. For example, topical pain therapy can provide effective treatment while avoiding the side effects that some oral medications can produce.

We have products that can help treat the following conditions (some examples below):

- Arthritis
- Neck and Back Pain
- Knee and Elbow Pain
- Nerve Pain
- Headaches
- Carpal Tunnel
- Achilles Tendonitis
- Plantar Fasciitis

Many compounds are covered by drug plans. Our pharmacy will direct bill to your plan, so you only pay your portion and don't have to mail in your receipt for reimbursement.

2019 Tax Receipt for Prescriptions

It's that time of the year again...curling, hockey, and taxes – well, 2 out of 3 isn't bad. To make life a bit easier, simply ask your pharmacist to provide a tax receipt of all your prescriptions for the previous year.

This report only takes the pharmacy a couple minutes to print off, and is usually more convenient than keeping track of individual receipts.

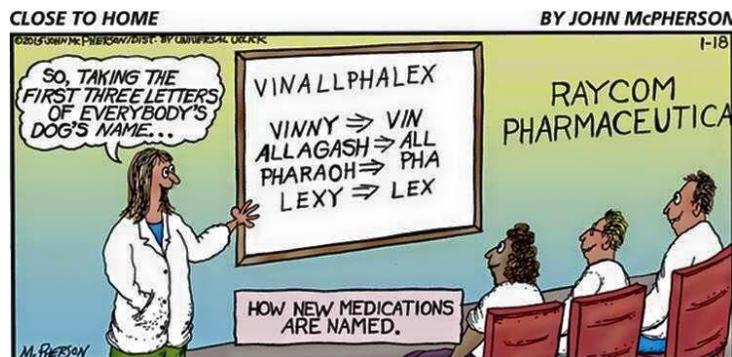

Our Hours of Business

- Monday to Thursday: 8:30 – 5:30
- Friday: 8:30 – 5:00
- Saturday: 9:00 – 3:00
